

DATASHEET

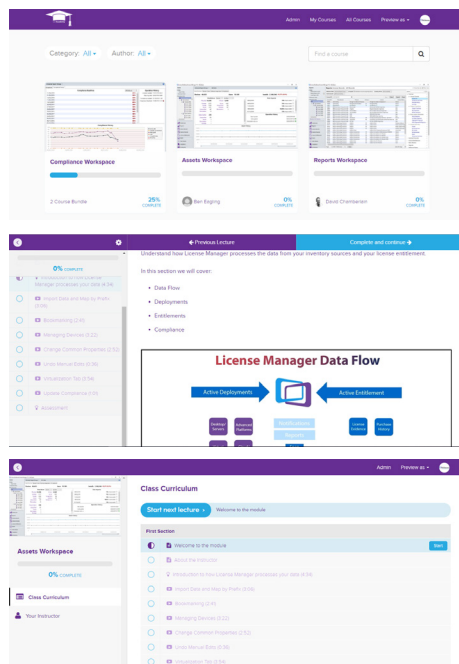

License Dashboard Academy

License Dashboard Academy is a combination of online videos and exam-based training designed to ensure License Dashboard customers are fully educated on using the License Dashboard suite of software asset management products, as well as being fully equipped to manage their IT estate correctly.

Once you have completed each License Dashboard module you will gain an industry recognized qualification – Certified License Manager.

Based on real life scenarios, and developed by the consultants that use the tools daily, License Dashboard Academy walks users through all License Manager workspaces:

- Dashboards
- Reports
- License Records
- Contract Records
- License Entitlements
- Assets
- Data cleanse
- Compliance

Each course can be accessed at any point in time. The License Dashboard Academy provides short, computer-based training modules that focus on content necessary to achieve a specific set of learning objectives. At the end of each module users will complete a short assessment to identify their accomplishments or training needs.

By completing the License Dashboard Academy and gaining the certification, organizations will maximize their investment in License Manager and be able to fully manage the entire software lifecycle across their network. Users will also understand where key details of their environment stand and how to share these details with senior management.
