

## DATASHEET

# Microsoft Review

Typically, 80 – 90% of the software used in your business will be from Microsoft and your agreement with them means that you must be fully licensed to use their products.

A Microsoft Review from License Dashboard provides your organization with an Effective License Position (ELP) and also gives you a flavour for how an effective Software Asset Management program could help your business manage its software assets.

### What is required for a Microsoft review?

- Complete background of your existing IT infrastructure and environment
- Deployment inventory data for each location where Microsoft software is installed
- Entitlement data from procurement and any applicable sources or suppliers (other than the Microsoft Licensing Statement (MLS) report provided by Microsoft) which may include:-
  - OEM
  - Full Packaged Product (FPP) / Retail
  - Outsourcer
  - Service Provider
  - Resellers
  - Information regarding mergers, acquisitions or divestitures

### Unparalleled Microsoft Software Asset Management

License Dashboard is ideally placed to help organizations meet any license review requirements, and ensure that all entitlements and volume licensing schemes are delivering real business value.

### Managing Microsoft Software Assets

Following a Microsoft Review, License Dashboard has two options for assisting with Microsoft Software Asset Management, one through our world-class ITAM tool, License Manager, and the other through our Managed Service.

### Business Benefits

- Generate your Effective License Position
- Understand how you can better optimize your Microsoft estate
- Avoid non-compliant licensing scenarios
- Negotiate future Microsoft agreements from an authoritative position
