License Manager

Audit Connectors

License Dashboard understand that replacing or duplicating existing inventory and discovery solutions is slow and painful. Our range of out-of-the-box connectors designed to integrate your existing audit solution into License Manager. There's no faster way to start managing your software licenses.

License Manager Audit Tool Connectors support:

- Multiple concurrent data feeds from several tools
- Out-of-the-box functionality with no configuration
- Collection of software install & hardware configuration data
- Import of both EXE & MSI data to identify both installed products and suites
