

Three Steps to Effective Software Asset Management

SAM Essentials from License Dashboard gives your organization access to a leading Software Asset Management product and Managed Service with Ongoing Staff Training

Save up to 30% on Software Costs with Three Steps to Effective Software Asset Management

Product + Service + Training

SAM Essentials ensures your organization quickly experiences the cost savings and compliance risk reduction provided by an effective Software Asset Management program, whilst providing your team with the skills to manage software licenses and identify budget saving opportunities. By combining your investment in a SAM tool with service and support provided by License Dashboard SAM experts, you can be confident that your organization has the essentials of a SAM program covered from day one, whilst building for the future with structured SAM training provided by License Dashboard.

Product - License Manager

License Manager is a powerful yet easy-to-use platform which allows organizations to accurately manage software licenses. The tool provides advanced licensing automation, speeding up day-to-day tasks for Software Asset Managers and ensuring that complicated license metrics are correctly calculated. License Manager ensures an organization is receiving the maximum ROI on their software purchases, often saving businesses up to 30% of their software spend.

Service - Select Which Software to Manage

License Dashboard SAM Consultants ensure your organization is up and running in days, not months. Your organization selects either three, five or ten key vendors to be managed by the License Dashboard experts. The proof of entitlement and software inventory for your selected key vendors is then validated and uploaded on your behalf, with continued quarterly health checks to validate your compliance status. Your organization's own SAM Manager has full access to License Manager and can continue to manage all vendors deployed across your software estate.

Training - Develop Your Own SAM Skills

Every SAM Essentials customer nominates a member of staff to become the owner for the organization's SAM program. The extensive training and support provided by License Dashboard as a part of SAM Essentials allows the customer to select any member of staff, regardless of SAM experience. License Dashboard provide a structured three-year development plan, assessed quarterly by your dedicated License Dashboard SAM Consultant. Your SAM owner also receives access to both the online License Dashboard Training Academy and online licensing training provided by The ITAM Review, resulting in the award of industry recognized qualifications.

Features & Benefits

Three Levels to Suit Your Organization

SAM Essentials is designed to suit the requirements of your organization. You have full access to manage your entire software estate using the License Manager application. License Dashboard's experts will ensure that a selection of your key vendors are quickly onboarded, and in a correct state to manage. These selected vendors will continue to receive quarterly health checks by our SAM consultants to ensure your organization is receiving the best possible value from your SAM investment. Contact License Dashboard to view the full list of managed vendors applicable for SAM Essentials.

Personal Development Plan

Your organization's nominated SAM Owner will enrol onto the License Dashboard SAM Essentials Personal Development Plan. This includes access to the online LD Academy which provides video based SAM tool training as well as access to The ITAM Review's LISA licensing training school. The three-year development program is aligned to official IT Asset Management ISO Standards, resulting in your organization skilling up to full SAM professional standards. Assessed on a quarterly basis by License Dashboard's SAM Consultants, your organization's SAM Owner is awarded industry recognized qualifications. They also receive certification from License Dashboard as SAM Analyst in Year One, SAM Specialist in Year Two and SAM Practitioner in Year Three.

SAM Essentials ensures that your organization can take ownership of the vast opportunities provided by an effective SAM program, rather than relying on third party support.
