

DATASHEET

SaaS Management Platform

License Dashboard's SaaS Management Platform simplifies the process of tracking, managing and optimizing SaaS spend and Cloud costs.

SaaS subscription costs can rapidly get out of control. License Dashboard's platform solves this problem by optimizing employees' SaaS usage, discovering SaaS underutilization and detecting shadow IT. License Dashboard identifies SaaS applications used in your organization and provides detailed insights, recommendations and statistics.

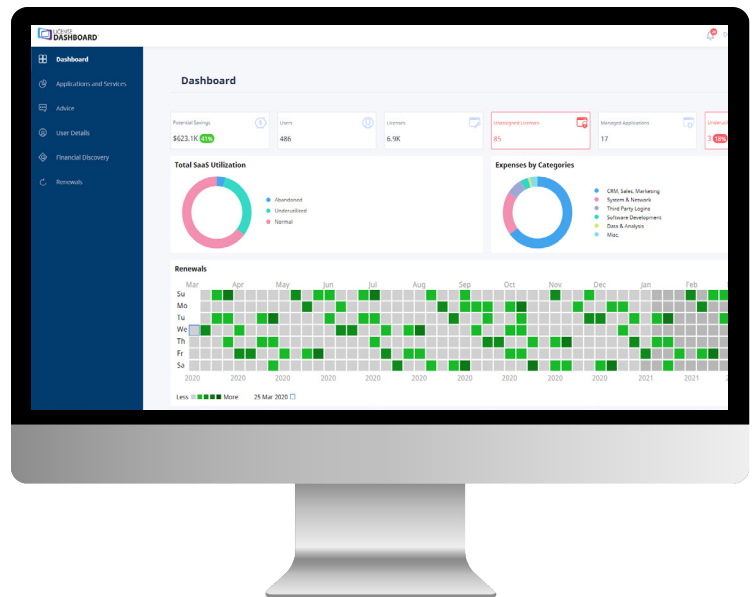

SaaS Subscription Management

License Dashboard users can now make more informed decisions on their SaaS license options and understand the potential cost savings available across products, platforms and even individual users. By understanding SaaS application usage organizations are able to optimize their spend, comparing actual usage to available licenses and converting unused and underutilized applications into savings.

The SaaS Management Platform provides ongoing scanning of SaaS applications and presents License Dashboard users with detailed cost saving recommendations for every SaaS application and Cloud platform in use across the organization. Underutilized, idle and abandoned instances and licenses are clearly highlighted, with recommendations for more suitable licenses displayed based on individual users activity within applications such as the Office 365 suite.

Cost Saving Recommendations for All Apps

License Dashboard provide users with automatic, intelligent cost saving recommendations for your SaaS products and IaaS platforms

The platform identifies abandoned, unassigned and underutilized licenses as well as detecting unused features, providing recommendations for downgrading licenses onto to lower-cost payment plans.

Track and Manage SaaS Renewal Dates

Never lose sight of your SaaS and Cloud spend by tracking and monitoring all SaaS billing spend in one place. Allow for better budgeting and forecasting as well as empowering Procurement decisions with access to all of the SaaS spend and financial data you require. See payment plans and billing periods at-a-glance for all products and compare with utilization statistics to ensure your organization only renews what is necessary for the business.
